

WHAT IS CLAIMED IS:

1. A cartridge comprising:
 - a case accommodating a recording medium therein; and
 - a label area surrounded by a rectangle-like standing wall at an outer face of the case,
 - wherein a portion in a longitudinal direction of one side portion of the standing wall is excised to provide a cut-away portion, which communicates with the label area, at the case.
2. The cartridge of claim 1, wherein the label area is formed at a rear wall of the case, at a rear side in a direction of loading the case into a drive device, and the cut-away portion is provided at a substantially central portion in the longitudinal direction of an upper side portion of the standing wall.
3. The cartridge of claim 2, wherein the cut-away portion is provided to communicate with an upper face of the case.
4. The cartridge of claim 1, wherein the label area is formed at a rear wall of the case, at a rear side in a direction of loading the case to a drive device, and the cut-away portion is provided at a substantially central portion in the longitudinal direction of a lower side portion of the standing wall.
5. The cartridge of claim 1, wherein the outer face of the case is recessed to form the standing wall.

6. The cartridge of claim 1, wherein the standing wall is formed to be protruded from the outer face of the case.
7. The cartridge of claim 1, wherein the recording medium comprises recording tape wound on at least one reel and the cartridge includes a recording tape cartridge.
8. The cartridge of claim 1, wherein the recording medium comprises a disc medium and the cartridge includes a disc cartridge.
9. The cartridge of claim 1, wherein the case includes an upper case and a lower case, and the label area is formed to extend over the upper case and the lower case.
10. The cartridge of claim 9, wherein a surface area of the label area at the upper case is formed to be greater than a surface area of the label area at the lower case.
11. A cartridge comprising:
 - a case including an upper case and a lower case and accommodating a recording medium therein; and
 - a label area surrounded by a rectangle-like standing wall at an outer face of the case,
 - wherein a portion in a longitudinal direction of one side portion of the

standing wall is excised to provide a cut-away portion, which communicates with the label area, at the case.

12. The cartridge of claim 11, wherein the label area is formed to extend over the upper case and the lower case.

13. The cartridge of claim 12, wherein a surface area of the label area at the upper case is formed to be greater than a surface area of the label area at the lower case.

14. The cartridge of claim 11, wherein the label area is formed at a rear wall of the case, at a rear side in a direction of loading the case to a drive device, and the cut-away portion is provided at a substantially central portion in the longitudinal direction of a lower side portion of the standing wall.

15. The cartridge of claim 11, wherein the outer face of the case is recessed to form the standing wall.

16. The cartridge of claim 11, wherein the standing wall is formed to be protruded from the outer face of the case.
